

HP Manufacturing Unique Image Identifier

Please ensure a unique identifier is incorporated in each customer provided image. This will be utilized for image verification in HP's front-end and backend processes to ensure the correct image is being setup and deployed in HP's Manufacturing sites. If you have any questions please engage your Sale Project Manager.

See below for acceptable methods:

1.) Version in Registry Key

HKEY_LOCAL_MACHINE\software\ImagedMachine\NC6400 = 1.1

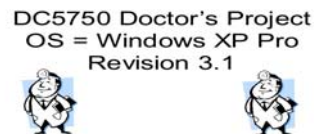

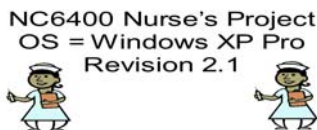

Or

HKEY_LOCAL_MACHINE\software\ImagedMachine\DC5750 = 3.1

2.) File on Hard Drive (i.e. a bitmap or JPEG)

File Path c:\Image.JPG

See attachment for sample.

3.) Text File

Path of file location:

Location path C:\Image.txt

File Content:

NC6400 Nurse's Project

Revision 2.1

OS = XP Pro

Or

DC5750 Doctor's Project

Revision 3.1

OS = XP Pro

Special Note: Each image should contain its own unique identifier as this is a Hewlett Packard Manufacturing requirement.
